CONFERENCE

The Image Conference

The Image Conference, the annual conference of the Visual Arts Circle, is an innovative and collaborative project which seeks to explore the possibilities which film, video, images and video games offer to both language teachers and language learners. The rationale behind The Image Conference is that today we are saturated with visual stimulation and that the visual image has taken over. In the twenty-first century, the ability to interpret, analyse and create images is an integral part of literacy. The aim of The Image Conference is to put images at the centre of the language learning agenda and offer guidance on using images critically and creatively in language teaching in the age of the Internet. The Image Conference brings together leading experts and practitioners in the use of images in language learning who share their experiences, insights and know-how and provides participants with an excellent opportunity to enhance their competence in the innovative and creative use of images. The conference is held in a different city every year. So far it has been held in Barcelona, Spain, Brasília, Brazil, Córdoba, Spain, Munich, Germany and Valletta, Malta. We are very proud to be holding the sixth edition of the conference in collaboration with APPI in the beautiful city of Lisbon.

Kieran Donaghy

APPI is most honoured and delighted to have the opportunity to welcome the sixth edition of the prestigious The Image Conference. Having accepted Kieran's invitation to co-organise it for the first time in Portugal, the APPI Executive Committee has planned this singular professional development event with hard work and great gusto, and aimed at making a difference in the delegates' classroom practice and their students' performance.

This Conference has been made possible thanks to the generous support of the host school administration - *Escola Secundária Eça de Queirós* -, the team of qualified speakers, and all those involved both in the preparation and running of the event.

The APPI Executive Committee wishes delegates and speakers a high-quality, fruitful Conference.

Alberto Gaspar

Welcome to our conference!

About APPI

APPI's activity is focused on improving English language teaching in Portugal. To this effect APPI has been providing their members with a number of opportunities for building their own professional development. APPI's mission is achieved through consistently appealing to members and teachers of English at large for a lifelong professional updating to be made possible both by APPI's human and material resources.

A little bit of history

Between 1979 and 1984 the Portuguese teachers of English had the support of TESOL Portugal – a branch of [TESOL-Teachers of English to Speakers of Other Languages, Inc.](#), now TESOL International whom APPI is affiliated with.

APPI started taking shape in 1985 at the TESOL Portugal 6th Annual Convention held at *Escola Preparatória de Rio Tinto*, in Rio Tinto (Greater Porto) thanks to a few teachers already connected to TESOL Portugal – “APPI's founding members” – who made it their duty to have an association of teachers of English with a Portuguese name and recognised by Portuguese law. This took place in December 1985. A few months before this, on May 9-11 at *Escola Secundária de Benfica*, in Lisbon, APPI-TESOL (during the so-called transition period) had become a reality through the APPI-TESOL 7th Annual Convention. And APPI took off in 1986: prior to the 1st Annual Convention, which took place at *Escola Superior de Educação* in Viana do Castelo on May 8-10, APPI had 455 members; at the end of that Convention weekend it had 750 and has continued to grow steadily.

APPI shared a rented ground floor (no. 10) located in a very steep street in the typical Bica neighbourhood close to downtown Lisbon – someone suggested it would be '10 Down St.' – with two sister associations, APPF-French and APPA-German, for some years between 1986 and early 1996. In March 1996 APPI purchased its present-day headquarters situated in Rua Dr. Joaquim Manso, 1A 1500-240 Lisbon (Benfica).

Since its conception, APPI has gone through various changes in finding the best way to achieve its principal aim: to help improve English language teaching in Portugal embracing teachers of all levels. Maintaining this aim has made APPI expand its professional activities and membership to being one of the largest and most active non-profit-making associations of its kind in Europe.

Our Conference Venue

Eça de Queirós Secondary School is the head office of Eça de Queirós School Cluster, also including Basic Schools Vasco da Gama and Parque das Nações, being at the same time the promoter organisation of a Qualifica Centre.

School community comprises about 200 teachers, more than fifty non-teaching staff, as senior technicians and technical and operational assistants and also around 2000 students among children, young people and adults, in an extensive and wide educational offer, from the pre-school to the secondary school, on a regular or professional basis.

In this context, the school cluster educational project could only be the lifelong education and training one in the fields of education, skills development, promotion of knowledge and qualification, as well as recognition, validation and certification of skills acquired by the adult students in formal or non-formal context, during working life.

In order to promote school and educational success, we make use of diverse strategies, inside and outside the classroom, ie, within the scope of curricular, extra-curricular or curriculum complement activities such as the study support, several activities, clubs and projects, national and international contests and participations. Numerous protocols and partnerships are established.

Aware of the importance of foreign languages learning, school English teaching is a strong commitment; after having integrated the pilot experience of the English bilingual teaching in the 1st cycle, now we just get the English teaching as an additional offer in 1st and 2nd school years and a curricular offer as of the 3rd school year.

In this school year, we count on the cooperation of an English language assistant, under Erasmus+ Programme, who will monitor the English language teaching and also the introduction to the English language teaching in the pre-school education.

In the constant search of a continuous improvement of school performance, we invest in the quality, efficiency and effectiveness, always aiming to achieve school performance excellence.

Picturebooks and their films: multimodality on pages and screens

SANDIE MOURÃO | APPI (Rio Seco, Portugal)

Plenary session 2

09:00 > 10:00 Auditorium 1

Literacy pedagogy has been expanded to include a variety of text forms, moving away from a single focus on the word and recognizing other representational modes such as the visual image, sound, gesture and spatial organisation (New London Group, 1996). Multimodal texts like picturebooks and film can bring these different modes into the classroom and afford opportunities for teachers and learners to use English through interaction with and around these texts. This plenary will look at two picturebooks and their short animated films. Each is suitable for language learning in different contexts, from primary through to secondary education. I will analyze the different teaching / learning affordances each book and its film offers and suggest ways in which they can be integrated successfully into a learning programme ensuring that learners are actively involved in thinking and interpreting through English.

Fostering intercultural communicative competence through film

CARMEN HERRERO | Sponsored by MultiWay - Manchester Metropolitan University (Manchester, UK)

17:40 > 18:40 Closing plenary - Room 1

Living in a globalised world has reinforced the belief that the primary aim of second language acquisition is to facilitate learners to communicate with people from different linguistic and cultural backgrounds. A growing number of language teachers, teacher educators and researchers have suggested that learning a language involves not only fostering linguistic competence but also intercultural communicative competence (ICC) to be able to deal effectively and appropriately with cultural and linguistic diversity. The overall goal of this presentation is to consider different approaches to promote ICC through the use of film and short films in English. The pedagogical model outlined in this presentation takes into account the changes in the concept of the term literacy due to the new social, cultural and technological practices, and captures the paramount importance of multimodal communication and Media Literacy in learning and teaching English as L2. This presentation will offer a series of practical classroom activities covering a range of language levels (from Primary to Higher Education).
